

Fry Word Lists

The Fry Word List is made up of the 1,000 words that were found to be high frequency words in by Dr. Edward Fry. These words are the words that are found the most in 3rd-9th grade level reading materials. The first 100 words correlate to kindergarten and first grade. The second and third 100 words should be mastered by the end of third grade, and the remaining words should be mastered by fifth grade. The words are best learned no more than ten at a time. To find out where your child needs to start on the list, you can have them read the list of words to you. Mark the words that they struggle with and use those for the activities and for extra practice.
